

## Evaluation Planning

1. What is your research question?
2. Will you use qualitative methods, quantitative methods, or both to answer this question?
3. What metrics will you use to answer this question?
4. What data will you gather to answer your research question?
5. Who are your participants?
6. What are your independent variables?

7. What are your dependent variables?

8. List any confounding variables.
